## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30, drawn to a control system/circuit and method(s) of using/operating the same, classified in class 341, subclass 144+.
  - II. Claims 31-34, drawn to a method of controlling the current through an output pad connected to an output driver circuit, classified in class 326, subclass 82+.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the method as recited in claims 31-34. The subcombination has separate utility such as: it can be used in any integrated circuit that requires the current through output pads.

2. During a telephone conversation with Mr. Scott Moore on September 28, 2004 a provisional election was made **without** traverse to prosecute the invention I (claims 1-30). The invention II (claims 31-34) is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Scott Moore on September 28, 2004.

The application has been amended as follows:

Claims 31-34 have been deleted.

### ***Allowable Subject Matter***

4. Claims 1-30 are allowed.

5. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claimed invention is the inclusion of the analog control unit as set forth in the above claims and method(s) of using/operating the same. These unique features, among other things, have not been found or shown in the prior art of record. Therefore, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
